

Md Nafiz Al Ifat

London, Ontario • 437-733-4613 • mdnafizalifat@gmail.com • [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with 7+ years of experience building scalable web applications using PHP, Laravel, Vue.js, React, MySQL, and REST APIs. Experienced in developing enterprise business platforms, modernizing legacy systems into Dockerized microservices, and delivering end-to-end features in Agile environments. Strong background in backend architecture, frontend integration, database optimization, and collaborative software development. Passionate about building reliable, user-focused applications while continuously learning new technologies and contributing to team success.

SKILLS

Languages & Backend: PHP, JavaScript, TypeScript, Python, Java, HTML/CSS, jQuery

Frameworks & Libraries: Vue.js, React.js, Laravel, CodeIgniter, Spring Boot, Symfony, WordPress, AngularJS

Databases: MySQL, PostgreSQL, Redis, NoSQL, Firestore

Cloud, DevOps & APIs: Docker, Kubernetes, AWS, Firebase, Jenkins, GitHub, CI/CD, REST APIs, RabbitMQ, GraphQL

Testing & Quality: PHPUnit, Unit/Integration/Performance Testing, TDD, Debugging, Optimization

AI & LLM: OpenAI GPT-3.5/4 APIs, Prompt Engineering, Parameter Tuning, Caching Strategies

Methods: Agile, Code Reviews, WCAG 2.1 Accessibility, Mob/Pair Programming

PROFESSIONAL EXPERIENCE

Independent Researcher & Developer | *Self-Directed*

May 2025 - Present

- Published 2 peer-reviewed papers on API security in CI/CD pipelines (IEEE & ACM) during and after graduation.
- Built and deployed FIFA World Cup Hub - a full-stack web app with real-time OpenAI-powered chat assistant.
- Developing a personal portfolio using React.js with GitHub Actions CI/CD pipeline.
- Actively upskilling in Generative AI, LLM integration, prompt engineering, and modern AI-powered application development.
- Completed part-time work while maintaining consistent focus on research, open-source projects, and technical growth.

Graduate Teaching Assistant | *Western University, London, Ontario*

Jan 2024 - Apr 2025

- Supported undergraduate CS courses covering RESTful APIs, modular design, and testing best practices.
- Collaborated with faculty to improve course delivery and student engagement.
- Mentored students on software architecture concepts and practical coding skills.

Software Engineer | *DataSoft Systems Bangladesh Limited, Dhaka*

Jan 2020 - Nov 2023

Projects: Microfin360 (enterprise microfinance ERP & Mobile App), Audit360 (compliance & audit system)

- Migrated a monolithic PHP system to Dockerized microservices with CI/CD pipelines, reducing deployment friction.
- Designed and maintained 25+ secure REST APIs with authentication and rate limiting, reducing error rates by 40%.
- Optimized MySQL queries, improving p95 latency from 850ms to 280ms and reducing database CPU usage by 30%.
- Reduced production defects by 30% through improved architecture, testing, and code reviews.
- Mentored junior developers via code reviews and knowledge-sharing sessions.
- Participated in sprint planning, retrospectives, and backlog refinement within Agile teams.

Software Developer | *DataSoft Systems Bangladesh Limited, Dhaka*

Oct 2016 - Dec 2019

Project: Microfin360

- Developed and maintained backend modules in PHP (CodeIgniter) for a large production financial system.
- Built reusable UI components with HTML, CSS, and jQuery, reducing frontend delivery time by 15%.
- Collaborated with developers and QA to diagnose and resolve production issues.
- Worked on high-volume financial systems handling complex transactional workflows.

EDUCATION

Master's in Computer Science | *Western University, London, Ontario*

Jan 2024 - Apr 2025

- Relevant coursework: Software Architecture & Agile Development, Accessibility Evaluation, Design Principles & Usability Testing

BSc in Software Engineering | *American International University – Bangladesh (AIUB)*

Oct 2012 - Dec 2017

PROJECTS

FIFA World Cup Hub - Full-Stack Web Application

- Built an interactive platform to explore FIFA World Cup history with a real-time AI chat assistant powered by OpenAI.
- Developed Vue 3 + Tailwind CSS frontend with responsive design, countdown timer, and chat interface.
- Implemented Laravel backend with secure REST APIs, database migrations, and OpenAI Chat Completions integration.
- [GitHub Repository](#)

Portfolio Website - React.js + CI/CD

- Building a full-stack portfolio using React.js with automated deployment via GitHub Actions CI/CD.
- [GitHub Repository](#)

Figma UX Projects - UI/UX Design

- [Steam App Redesign](#) - improved navigation, layout consistency, and visual hierarchy. [Report](#)
- [Western Student Center Course Registration Redesign](#) - reduced user friction with accessible layouts. [Report](#)

Khelapora - PHP Web Application

- Built a dynamic PHP (CodeIgniter) site with secure admin panel, role-based access control, and content management.
- [GitHub Repository](#)

PUBLICATIONS

- **IEEE** | A Threat-Oriented Study of API Security Challenges in CI/CD Pipelines - [View Paper](#)
- **ACM** | A Defence-Oriented Study of API Security in CI/CD Pipelines - [View Paper](#)

EDUCATION

Master's in Computer Science | Western University, London, Ontario

Jan 2024 - Apr 2025

- Relevant coursework: Software Architecture & Agile Development, Accessibility Evaluation, Design Principles & Usability Testing

BSc in Software Engineering | American International University – Bangladesh (AIUB)

Oct 2012 - Dec 2017
