

Md Nafiz Al Ifat

London, Ontario • 437-733-4613 • mdnafizalifat@gmail.com • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science professional with 7+ years of software development experience and graduate-level teaching experience at Western University. Experienced in software engineering, REST APIs, databases, testing practices, UI/UX design, and curriculum support. Proven ability to mentor students, collaborate with faculty, develop technical learning resources, and translate complex technical concepts into practical learning experiences. Passionate about advancing computing education through modern industry-aligned tools and teaching practices.

SKILLS

Languages & Backend: Python, JavaScript, TypeScript, PHP, Java, HTML/CSS, jQuery

Frameworks & Libraries: Vue.js, React.js, Laravel, CodeIgniter, Spring Boot, Node.js, Symfony, WordPress

Databases: MySQL, PostgreSQL, Redis, NoSQL, Firestore

Cloud, DevOps & APIs: Git, GitHub, Version Control, Docker, Kubernetes, AWS, Jenkins, CI/CD, REST APIs, RabbitMQ

Testing & Quality: PHPUnit, Unit/Integration/Performance Testing, TDD, Debugging, Optimization

AI & LLM: OpenAI GPT-3.5/4 APIs, Prompt Engineering, Parameter Tuning, Caching Strategies

Methods: Agile, Code Reviews, WCAG 2.1 Accessibility, Instructional Design Principles, Curriculum Support

PROFESSIONAL EXPERIENCE

Independent Researcher & Developer | *Self-Directed*

May 2025 - Present

- Published 2 peer-reviewed papers on API security in CI/CD pipelines (IEEE & ACM) during and after graduation.
- Built EPL Football Tracker Python Flask REST API + SQLite + vanilla JS, deployed live on Railway.
- Built and deployed FIFA World Cup Hub - a full-stack web app with real-time OpenAI-powered chat assistant.
- Developing a personal portfolio using React.js with GitHub Actions CI/CD pipeline.
- Actively upskilling in Generative AI, LLM integration, prompt engineering, and modern AI-powered application development.
- Completed part-time work while maintaining consistent focus on research, open-source projects, and technical growth.

Graduate Teaching Assistant | *Western University, London, Ontario*

Jan 2024 - Apr 2025

- Supported undergraduate computer science laboratory sessions and technical coursework.
- Assisted students in understanding software architecture, REST APIs, testing methodologies, and software design principles.
- Provided technical guidance during lab activities, assignments, and project work.
- Collaborated with faculty members to improve course delivery and learning outcomes.
- Helped students troubleshoot development environments, programming assignments, and software-related issues.
- Contributed to creating an engaging and supportive learning environment for students.

Software Engineer | *DataSoft Systems Bangladesh Limited, Dhaka*

Jan 2020 - Nov 2023

Projects: Microfin360 (enterprise microfinance ERP & Mobile App), Audit360 (compliance & audit system)

- Migrated a monolithic PHP system to Dockerized microservices with CI/CD pipelines, reducing deployment friction.
- Designed and maintained 25+ secure REST APIs with authentication and rate limiting, reducing error rates by 40%.
- Optimized MySQL queries, improving p95 latency from 850ms to 280ms and reducing database CPU usage by 30%.
- Reduced production defects by 30% through improved architecture, testing, and code reviews.
- Implemented authentication, authorization, and API security best practices using OAuth2/JWT and secure coding standards.
- Created technical documentation and knowledge-sharing materials to support developers and improve team onboarding.

Software Developer | *DataSoft Systems Bangladesh Limited, Dhaka*

Oct 2016 - Dec 2019

Project: Microfin360

- Developed and maintained backend modules in PHP (CodeIgniter) for a large production financial system.
- Built reusable UI components with HTML, CSS, and jQuery, reducing frontend delivery time by 15%.
- Collaborated with product owners, QA teams, and stakeholders to design and deliver user-focused features aligned with business requirements.
- Worked on high-volume financial systems handling complex transactional workflows.

EDUCATION

Master's in Computer Science | *Western University, London, Ontario*

Jan 2024 - Apr 2025

- Software Architecture & Agile Development
- Design Principles & Usability Testing
- Accessibility Evaluation
- Human Computer Interaction
- Directed Study: API Security in CI/CD Pipelines

BSc in Software Engineering | *American International University Bangladesh (AIUB)*

Oct 2012 - Dec 2017

PUBLICATIONS

- **IEEE** | A Threat-Oriented Study of API Security Challenges in CI/CD Pipelines - [View Paper](#)
- **ACM** | A Defence-Oriented Study of API Security in CI/CD Pipelines - [View Paper](#)

PROJECTS

Figma UX Projects - *UI/UX Design*

- [Steam App Redesign](#) - improved navigation, layout consistency, and visual hierarchy. [Report](#)
- [Western Student Center Course Registration Redesign](#) - reduced user friction with accessible layouts. [Report](#)

FIFA World Cup Hub - *Full-Stack Web Application*

- Built an interactive platform to explore FIFA World Cup history with a real-time AI chat assistant powered by OpenAI.
- Developed Vue 3 + Tailwind CSS frontend with responsive design, countdown timer, and chat interface.
- Implemented Laravel backend with secure REST APIs, database migrations, and OpenAI Chat Completions integration.
- [GitHub Repository](#)

Portfolio Website - *React.js + CI/CD*

- Building a full-stack portfolio using React.js with automated deployment via GitHub Actions CI/CD.
- [GitHub Repository](#)

EPL Football Tracker - *Full-Stack Web Application*

- Built a football match tracking portal with live EPL 2025/26 data of 20 teams, real match results, auto-calculated league table, and top scorers leaderboard.
- Python Flask REST API backend (GET, POST, DELETE) with SQLite database using CTEs, GROUP BY, and CASE WHEN for standings calculation.
- Pure vanilla HTML/CSS/JavaScript frontend with dynamic DOM, modal forms, and team filtering. Deployed on Railway.
- [GitHub Repository](#)

Khelapora - *PHP Web Application*

- Built a dynamic PHP (CodeIgniter) site with secure admin panel, role-based access control, and content management.
- [GitHub Repository](#)
